Yash Agrawal @ Brown, Ricky Leung @ RIT, Andrew Xu @ UMD, Jack Munson @ Duke, Rishi Shah @ Cornell, Sreeansh Vakiti @ UIUC

So, what’s the problem?

1. Students and New Grads are more confused about their careers than ever.

2. Asking for advice on Reddit, Linkedin, or Cold Email doesn’t work.

3. Networking events are filled with job-searchers, not professionals with advice.

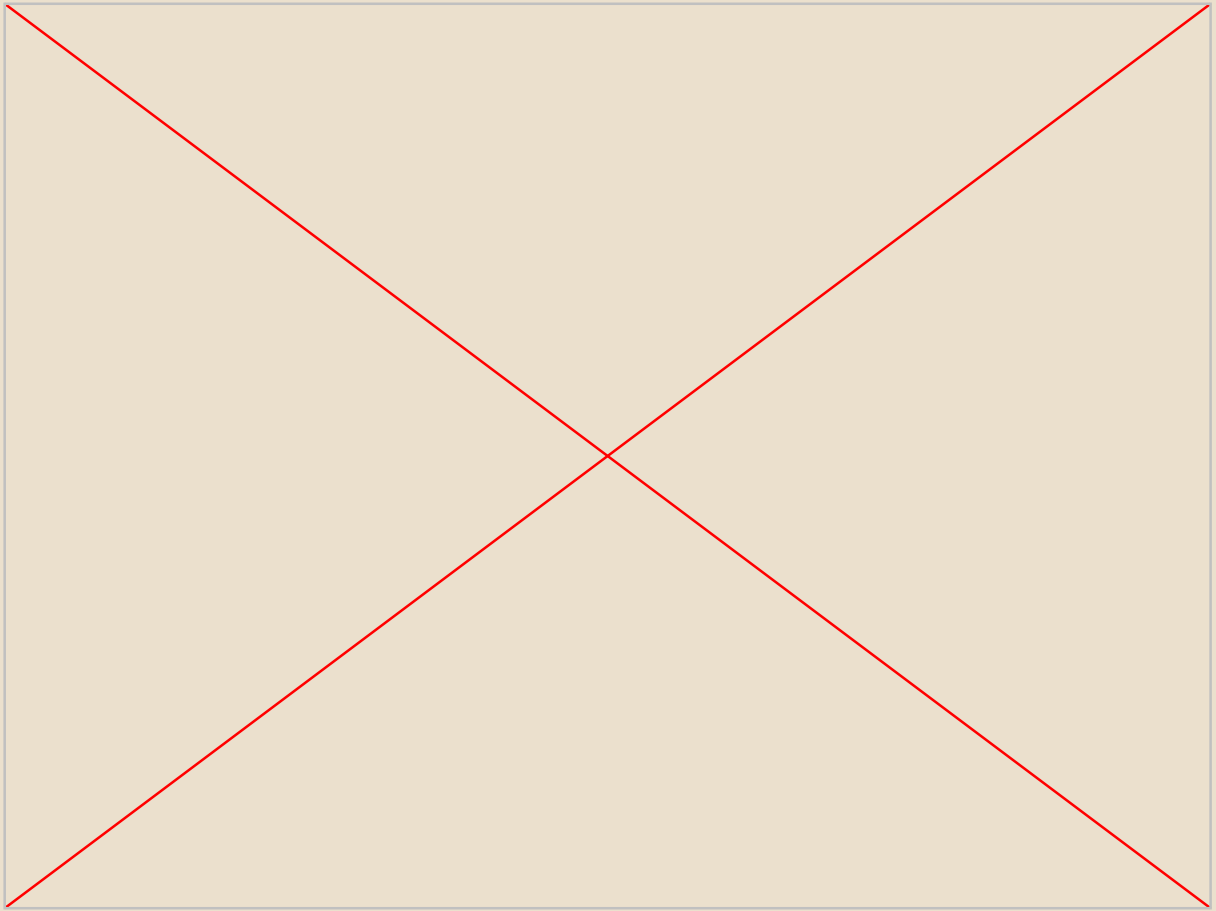
What’s the solution?

1. Connect students/new grads with mentors that can/want to help.

2. Enable those students to serve as mentor themselves, using their own role experience

3. Find the best match possible, based on shared experience/skills

Demo:



How we built it

Frontend:

Typescript, React.js, Next.js

Backend:

Python, Pydantic, FastAPI, Postgresql

Matching Algorithm:

Scikit-Learn,
ML Vector Embedding

Impact

1. Replaces Career Confusion with Actionable Clarity

- Move people from a state of confusion to one of confidence.

2. Builds a Self-Sustaining Mentorship Ecosystem

- A cycle where today’s mentees are tomorrow's mentors

3. Levels the Playing Field for High-Quality Guidance

- Break down traditional barriers and ensure the network gap is resolved

How we've innovated:

1

Matching

You have the **best possible mentor instantly**. No more searching for random people in your ideal role or company on LinkedIn.

2

No more spam

Only people who want to mentor are on the app. That mean**s no more "shotgun messages"** to multiple potential mentors. And you get less too.

3

Isolated from job search

Built for those who want to **learn and find their path**. Not those who just want a quick referral or interview.

4

Easy Messaging

Send message **creates an email.** Not an internal message or post your mentor will forget to check like Linkedin, Discord, or Reddit

5

Business Casual UI

Professional and non-sterile. A warm, empathetic transition for students from school to careers.

How we'll keep innovating

1. More Personalized Matching Through NLP and Resume Parsing

2. Sustainable Monetization Path Through Ad Banners or Sponsored Listings
